

The Community Information Service Operator Network

Data : Information : Intelligence : Decision

Company Mission

1. **Data Driven Solutions** : Support our clients with their needs for data driven decisions for better solutions.
2. **Data-center** : Provide a proximity secure and available data-center.
3. **TechHub** : Provide an on-boarding and capacity building facility for our service providers and clients
4. **Industry** : Promote a concept of closing the gap between education and industry.
5. **Employment** : Create meaningful youth employment opportunity for those who have completed academic education
6. **Investment** : Collaborate with investment managers to accelerate industry growth through favorable funding,

Available Partnership & Collaboration Opportunity

CisoNet has active opportunities in industry and is looking for collaboration and partnership in the following.

1. **Building Co-location Datacenter** : This is planned to be provided at Konza SEZ which is a tier 3 facility and expected to be the custodian of national data.
2. **TechHub** : Construction and building of an on-boarding, training and capacity building facility for those who expect to join us and continue practical learning on systems building and solution modeling.
3. **Client Solution Service** : Support clients in the industry who are looking to transition to smart and data driven technology applications for their operations
4. **Agribusiness** : Support our ready client in agriculture to carry out modern large scale commercial farming for fruits and other farm produce.
5. **Real Estate** : Support our client who is looking for a partnership to build real estate community housing as well as office and manufacturing facilities in an SEZ setting.
6. **Content Generation** : Create learning and educational content in line with the needs and national curriculum and learning standards
7. **Investment and Funding** : We are also looking at creating an investment facility to support our operations as well those of our clients in order get them contribute to society
