

PURPOSE STATEMENT

Welcome to this **AlphaTech Group**.

AlphaTech is a **CisoNet** Affiliate whose main objective is to close the gap between industry and education while creating employment opportunities through an earn as you learn concept and contributing to national development and environmental conservation.

The group is, specifically, focusing on the continued application and promotion of digital technology and especially artificial intelligence in education and in particular Early Childhood Development Education (ECDE).

In this respect, the members of this group will be focused in the creation of learning content for ECDE in line with national aspirations and competence based curriculum and will also be involved in promotion and creation of awareness and digital literacy for parents, teachers and administration on this emerging technology and its influence in learning and benefits to the learning needs of the child including creativity, imagination, innovation and human values.

All we need from you is your time, effort, commitment and realization of the huge opportunities available in our resource rich sphere awaiting for future exploitation for our children.

Once More Welcome to the group.

PROMPT PASSAGE

I want to create a whatsapp group for use in the recruitment of a team to support the utilization of digital technology in education. I want the group to appreciate the organization structure in which AlphaTch is an affiliate of CisoNet and its main role will be to support the creation of learning content of the child while working with the concerned parties in doing so. Please examine the following passage and in no more than 150 word, prepare a brief that encourages the registration and retainment of the group membership.

SOLUTION STATEMENT

Welcome to the **AlphaTech Recruitment Group**.

AlphaTech is an affiliate of **CisoNet**, established to bridge the gap between industry and education while creating sustainable employment through an *earn-as-you-learn* model. Our focus is the practical application of digital technology; especially Artificial Intelligence; in education, with special attention to Early Childhood Development Education (ECDE).

As a member, you will contribute to the co-creation of high-quality ECDE learning content aligned with national goals and the Competency-Based Curriculum (CBC). You will also participate in promoting digital literacy and awareness among parents, teachers, and administrators.

This group is a platform for purpose-driven collaboration, professional growth, and impact. Your commitment and active participation will help shape innovative learning experiences for children while unlocking meaningful economic opportunities.

Once more, welcome to a mission that transforms education and builds the future.

T

he LITEX Architecture: Bridging the Industrial Gap

In the modern economy, the distance between academic certification and industrial execution has never been wider. The **LITEX (Linking Industry To Education)** model closes this gap by transforming raw opportunities into intelligent, data-driven solutions.

The Transformation Workflow

Our process moves beyond simple observation. It begins with **Opportunity Abstraction**, where we isolate a core challenge and define it through a precise **Purpose Statement**. To move from a "Purpose" to a "Solution," we trigger a **Call for Experience**—drawing on historical context and human expertise to ground the vision.

From Logic to Visual Reality

Through **Workflow Extraction** and **Solution Contextualization**, we refine that Purpose into a technical **Solution Statement**. This statement serves as the foundation for generating **Object Packages**—high-impact images, videos, and decision-support tools.

The Power of the Prompt

Central to this evolution is the **AI Prompt**. By translating our Solution Statement into sophisticated AI directives, we empower learners to generate the resources necessary for real-world decision-making.

Join the movement. Master the algorithm of innovation and turn your insights into sustainable industrial wealth.
